## ■ Номенклатура

Система кодировки MANI отражает форму боров.

·TF конусообразный, плоский кончик ·TR конусообразный, закругленный кончик ·TC конусообразный, острый кончик ·FO пламяобразный, стрельчатый кончик ·SF прямой, плоский кончик ·SO прямой, стрельчатый кончик ·SR прямой, закругленный кончик ·EX специальная форма ·BR шарообразный ·DI двойной обратный конус ·SI простой обратный конус ·WR колесо, круглый край ·CR для препарирования ·CD для детской стоматологии ·S короткая ножка ·SS очень короткая ножка ·C coarse ·F fine ·EF extra fine ·RS для препарирования.

## ■ Цветная кодировка

Цветная вставка, расположенная на конце рабочей части бора обозначает степень абразивности алмазной крошки на рабочей поверхности бора

Зеленый – coarse/125–150 микрон      Голубой – standard/106–125 микрон      Красный – fine/53–63 микрон      Желтый – extra fine/20–30 микрон

## ■ Контроль качества

Каждое изделие проходит 100 % контроль качества с использованием лазерного оборудования. Для каждой партии производятся тесты на режущую способность и износостойкость. Для увеличения срока работы боров и достижения оптимального результата рекомендуется щедрая подача воды.

Максимально разрешенные обороты для боров, расположенных в каталоге:

на голубом фоне 450.000 r.p.m.  
на желтом фоне 300.000 r.p.m.  
на розовом 160.000 r.p.m.
